

FastTrackGov License and Permit Solutions

FastTrackGov, from Mitchell Humphrey, is an on-demand, subscription-based solution that provides a full suite of automated license, tax, and permit systems. Serving a variety of organizations including *county and municipal governments, government agencies, special districts, and taxing authorities*; *FastTrackGov* enables you to manage a broad array of revenue sources from a single, fully secured, integrated system.

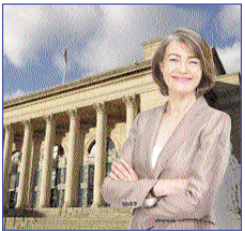

FastTrackGov delivers:

- A new era of **citizen convenience**, allowing individuals and businesses to apply and pay via the Internet
- Unprecedented **revenue maximization** opportunities with fully automated processes and controls
- Lower **cost per citizen served**, with automatic messaging among departments, approvers, and citizens
- An innovative pricing concept that requires **no capital outlay**

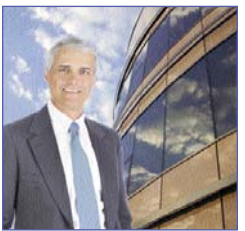

Citizens Can:

- Conveniently submit applications from their home or business
- Easily pay outstanding balances for licenses, taxes, and permits via the Internet
- Quickly and easily ask questions, check status, and receive responses
- Acquire their license or permit in significantly less time

Clerks and Administrators Can:

- Electronically communicate with all applicants, payers, and approvers
- Automatically schedule tasks to be performed and issue renewal notifications
- Improve internal controls by maintaining and displaying tasks required for each application
- Deliver faster, more efficient licensing, permitting and payment processing

Public Officials Can:

- Easily analyze operational results (revenues, license volume and type, citizens served, etc.)
- Enhance citizen satisfaction by processing applications faster and providing transparency
- Increase revenue potential by automating renewals, fee computations, and payments
- Ensure complete control over all licensing and permitting processes
